WEEKLY MORBIDITY REPORT  
EXPLANATORY COMMENT

REPORT NO. 174  
PAGE 1

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

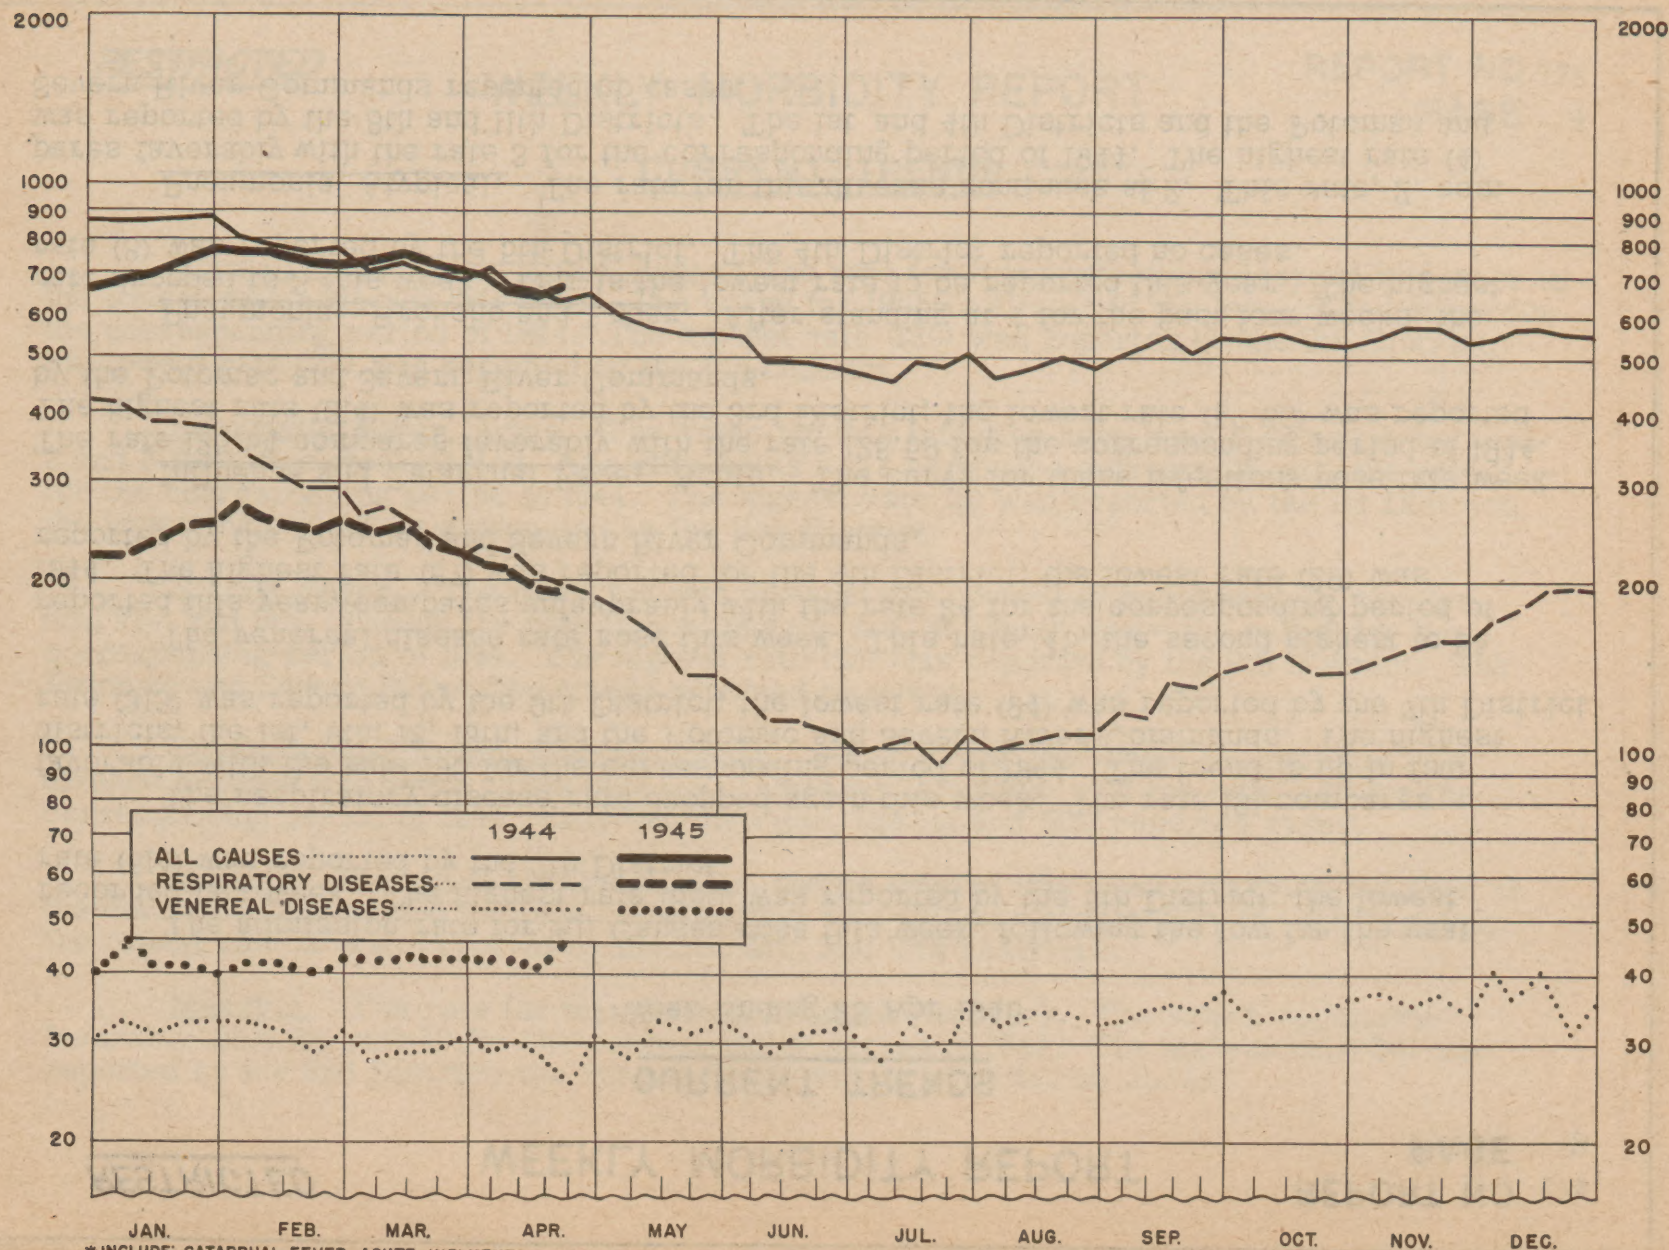

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

\*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;  
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;  
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

RESTRICTED

## WEEKLY MORBIDITY REPORT

REPORT NO. 174  
PAGE 3

### CURRENT TRENDS

Week Ending 28 Apr 1945

The admission rate for All Causes rose this week, following the low for the year recorded last week. The highest rate (860) was reported by the 8th District; the lowest rate (514) was reported by the 7th District.

The respiratory disease rate dropped again this week. The rate 191 compares favorably with the rate 195 for the corresponding period of 1944. The trend is up in four districts, the 1st, 9th, 12, 13th, and the Potomac and Severn River Commands. The highest rate (313) was reported by the 9th District; the lowest rate (94) was reported by the 7th District.

The venereal disease rate rose this week. This rate, 45, the second highest to be reported this year, compares unfavorably with the rate 24 for the corresponding period of 1944. The highest rate (67) was reported for the 4th District; the lowest rate (29) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The curve for these infections rose this week. The rate 126.54 compares favorably with the rate 128.59 for the corresponding period of 1944. The highest rate (214) was reported by the 3rd District; the lowest rate (57.60) was reported by the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. After standing at 4 for the past four weeks, the rate dropped to 3 this week. This is the lowest rate to be reported this year. The highest rate (8) was reported by the 5th District. The 4th District reported no cases.

Pneumonia, Atypical. The rate for this disease continues at 2. This rate, 2, compares favorably with the rate 3 for the corresponding period of 1944. The highest rate (4) was reported by the 8th and 11th Districts. The 1st and 4th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections dropped this week to the lowest rate reported this year. The curve for 1945 is almost at the level of the curve for the corresponding period of 1944. The highest rate (139) was reported by the 9th District; the lowest rate (25) was reported by the 6th District.

Rheumatic Fever, Acute. The rates for this infection have been alternating between 2 and 3 for a five week period. The rate 3 this week compares unfavorably with the rate 2 for the corresponding period of 1944. The highest rate (8) was reported by the 1st District; the lowest rate (0.46) was reported by the 12th District.

Scarlet Fever. The trend for this disease was upward in four districts, the 3rd, 6th, 7th, and 9th. Though the rate 15 continues to fall, it stands above the rate 9 for the corresponding period of 1944. The highest rate (63) was reported by the 9th District. The Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. After rising last week, the rate for this disease dropped this week. This rate 0.10 compares favorably with the rate 0.37 for the corresponding period of 1944. Only two districts, the 1st and 5th, reported cases.

Malaria. The curve for this disease turned upward this week, reaching the level of the corresponding period for 1944. The highest rate (13) was reported by the 4th District; the lowest rate (1) was reported by the 8th, 9th, and 12th Districts.

Measles. The rate for this disease dropped this week. The rate 5 compares favorably with the rate 10 for the corresponding period of 1944. The highest rate (15) was reported by the 3rd District; the 6th and 7th Districts reported no cases.
